

Focal Wall Installation Guide

Graphic Package Checklist (Items Included in Your Graphic Kit)

- ☐ State and Letters with preinstalled wooden dowels
- ☐ Template

Installation Questions?

Call our customer service team at
888.273.8726

Tools Required (Not included)

- ☐ Painters Tape
- ☐ Power Drill w/ .25" Bit
- ☐ Clear Silicone Adhesive

Installation Instruction:

1. Use painters tape to mount the supplied template to the wall in the exact location for installation. Double check that the template is centered and level in the desired location.
2. Using a .25" drill bit, drill the holes thru the hole dots in the supplied mounting template into the drywall (figure 1). If you drill into a stud be sure the hole depth is 1.25" minimum.
3. Once all the holes are drilled into the drywall remove the template and fill the holes with clear silicone adhesive (figure 2).
4. Each letter and symbol has wood dowel pins already inserted into the graphic (figure 3) so you will just need to set each individual letter and graphic into the correct holes, press firmly to the wall and wipe away any clear silicone that may have seeped out.
